## Education

**Graz University of Technology** — Graz, Austria

M.Sc., Electrical Engineering — August 2024 – March 2026

- Specialization in microelectronics and high-frequency engineering.
- Recipient of merit-based scholarships (TU Graz, 2024–25) and a corporate scholarship (Andritz AG, 2025).
- Exchange semester at Técnico Lisboa, Portugal (Winter semester 2025/26).
- Project experience in IC design using Cadence.

B.Sc., Electrical Engineering — October 2021 – August 2024

- Bachelor thesis in collaboration with Infineon on the design and construction of RF test hardware for ICs using Altium and Ansys HFSS.

**HTL Bulme** — Graz, Austria

Electronics and Technical Informatics — October 2016 – July 2021

- Development of an electrocardiogram as diploma thesis.

## Professional Experience

**Infineon Technologies AG** — Graz, Austria

Radar Verification Engineer — October 2026 - present

**Austrian Armed Forces** — Klagenfurt, Austria

National Military Service — April 2026 – September 2026

- Full-contingent track (BAK-BA2) as a radio operator.

**Infineon Technologies AG** — Graz, Austria

System Verification Engineer (Part-time) — September 2023 – May 2025

- Creation, execution, and maintenance of verification plans to ensure coverage of customer-specific technical requirements.
- Development of UWB and NFC test hardware using Altium for contactless, security-critical systems.
- Programming of automated test and measurement software using Python and JavaScript.

Requirements Engineer (Part-time) — October 2022 – September 2023

- Management and validation of requirements for automotive IC projects in compliance with functional safety standards using Jama/Jira.
- Collaboration with internal and external stakeholders in an international environment.

**Graz University of Technology** — Graz, Austria

Mathematics Tutor (Part-time) — October 2023 – February 2024

- Organization and delivery of mathematics tutorials for electrodynamics courses.

**STMicroelectronics** — Graz, Austria

Summer Intern — Summer 2018

- Gained initial professional experience in a technical environment.

## Scientific Work

- Prato et al. (2026): "Numerical Investigation of the Coupling Behavior of Electrically Small Magneto-Electric Antennas in TEM Cells." Presentation at IEEE CEFC on electromagnetic field computation, Greece.
- Prato (2026): "Equivalent Circuit Models of Near-Field Coupling between Electrically Small Antennas and TEM Cells." Presentation at the 30th International Student Conference Poster 2026, Czech Republic. Awarded by Rohde & Schwarz
